Journal of Agribusiness and Rural Development Research

Vol. 9 No. 1 January-June 2023

AGRARIS is a periodical scientific journal on Agribusiness and Rural Development. AGRARIS is published biannually (January – June and July – December) by Universitas Muhammadiyah Yogyakarta (UMY) and managed by the Department of Agribusiness, Faculty of Agriculture UMY in collaboration with the Agribusiness Association of Indonesia (AAI) and Indonesian Society of Agricultural Economics (ISAE). AGRARIS was indexed in Scopus (Q2) and got Science and Technology Index (SINTA) 1.

Preface

Bismillahirrahmaanirrahim. AGRARIS: Journal of Agribusiness and Rural Development Research Vol. 9 No. 1 (January-June 2023) has been published. This edition consisted of nine articles from six focuses and scopes: entrepreneurship and management of agribusiness; rural development; agricultural economics; agricultural extension, communication and education; agricultural marketing; and agricultural development and policy.

The study about entrepreneurship and management of agribusiness discussed Young Farmers’ Entrepreneurship during the Covid-19 Pandemic (Nurlaela, et al.). The rural development examined about Determinant Factors of Village-Owned Enterprise Best Practice in Indonesia (Kusmulyono, et al.). In agricultural economics consisted of two topics entitled Economic Efficiency of Rice Farming: A Performance Difference among Agricultural Insurance Participant and Non-participant Farmer (Helmy, et al.) and Determinants of Niger Seed Commercialization in the Jabitehenan District, West Gojjam Zone, Amhara National Regional State, Ethiopia (Mengstu, et al.). The study of agricultural extension, communication and education discusses Exploring the Relation between Farmer Group Membership and Agricultural Productivity: Evidence from Indonesian Rice Farming (Baga, et al.). The study of agricultural marketing consisted of three topics entitled The Impact of Collaborative Networks on Supply Chain Performance: A Case Study of Fresh Vegetable Commodities in Indonesia (Susanto, et al.); Exploring Muslim Consumers’ Acceptance of Cultured Beef Meat (Terano, et al.); and Korean Restaurants’ Consumer Needs Based on Marketing Mix Through the Kano Model (Zavira, et al.). Lastly, last, study of agricultural development and policy discussed Strategic Orientations to Strengthen Policymaking: Study of Small-Scale Cassava-Based Agroindustry in Central Java, Indonesia (Kusnandar, et al.). The various studies had been written from four countries that were Indonesia, Malaysia, Japan and Ethiopia.

The various research findings are expected to be a basis for stakeholders and policymakers who relate to the broader field of agricultural development and encourage the advancement of novel ideas for future studies. Lastly, we express our appreciation to all individuals who have made valuable contributions to the completion of this journal publishing, involving the authors, expert reviewers, and editors.

Yogyakarta, Indonesia June 2023
Editor in Chief

Dr. Ir. Widodo, M.P.
Manuscript Guidelines

Manuscript Submission Criteria:
1. The manuscript is a result of agribusiness and rural development research. The manuscript should have a novelty/authenticity contribution or uniqueness for academic (science) development.
2. The manuscript contains original research work, free from plagiarism and other unethical attitudes.
3. The author must ensure that the manuscript has not been published in the other periodical journals at the time of manuscript submission.

Manuscript Systematics:
1. Title. The title should be brief, describe the uniqueness of the research, not exceed 20 words, and should begin with a capitalized letter for each word.
2. Author’s name and affiliation. The author’s name should be included by affiliation (write completely) and email address, without the academic title.
3. Abstract. The abstract is written in English, one paragraph with single spacing (maximum 250 words) without references or formulas. Keywords consist of 3-5 words or phrases (alphabetically). The abstract contains a brief description of the research background (maximum two sentences), aims, methods, main results, and conclusion.
4. Introduction. The introduction is written without numbers and/or pointers. This section consists of (i) nature and scope of the problem in a broader (national, regional, international) context, (ii) review of relevant literature, (iii) significance/novelty/contribution of this research on knowledge, (iv) aims of this research. If there is a hypothesis, declare it explicitly and not in an interrogative sentence. It should be written efficiently and supported by references. Extensive discussion of relevant literature should be included in the discussion, not in the introduction.
5. Research Method. This section should explain how the research was conducted. It should be written clearly and completely containing a clear description of (i) population and sampling, (ii) data measuring and collecting, (iii) variable and data analysis. This research method should be sufficiently detailed. For qualitative research, please adjust this method to the scientific writing habits while considering the repeatability of the research. It was unnecessary to write analysis methods commonly (e.g., F-test formula, t-test) but just referred to your source. References of original methods/procedures must be stated, and all modifications of procedures (if any) should be explained. Symbol description of the model was suggested to be written on narration.
6. Result and Discussion. The beginning of the results and discussion presents the data and found facts, calculated, and discovered. Data should be presented in Tables or Figures when feasible. The table should be clear and stand-alone, giving complete information without text. The title of Table and Figure should briefly and clearly describe the described facts. Symbols written in Table and Figure should be given complete information and allow the reader to interpret the results. Each Figure and Table must be referred to in the narration. In the rest of the section, the author must discuss the research findings.
7. Conclusion. This section summarizes the principal findings and is written briefly. Conclusion related to the introduction and aims or hypothesis but did not repeat the discussion. Conclusion written critically, logically, and honestly based on the existing fact, and full of cautions if there was a generalization. A recommendation showed the significance of the results/findings or practical application. This section, written in paragraph form, does not use numbering or bullets.
8. Acknowledgments (if necessary). This section provided the authors with gratitude to the research funder, facility, or suggestion and for the statement if the article is part of the thesis/dissertation.
9. Author contributions: for the article with several authors, please write each author's contribution in a brief paragraph. The authorship must be limited to those who have contributed, besides reading and agreeing on the final manuscript.
10. Conflict of interest: the author should declare the conflict of interest or state "the authors declare no conflict of interest." The author must identify and state the circumstances that may influence the interpretation of the research results.
11. References. The reference contains the list of journals, books, or other publications referred to in this manuscript. Each reference cited in the text must be listed in references, and vice versa. References of the manuscript must be traceable, no less than 40 pieces (Min. 30 titles from reputable international journal), should be a primary source (80%), and not exceed 10 years (80%).

Manuscript Format:
1. The manuscript is written in quarto paper size, one column, and 1.5 spacing format. The new paragraph begins with six characters from the left side and uses Time New Roman font 12.
2. The manuscript is written in English.
3. The number of pages between 15-20, the margin on the left and upper sides is 3 cm, the right and bottom sides are 2.5 cm.
4. The title is written uppercase (except preposition) using font size 14 with center alignment. The subtitle is written uppercase and uses font size 12 if there is a sub-subtitle, written capital each word except conjunction. Write capital for each word and italic model if there is a sub of sub-subtitle. Subtitle, sub-subtitle, and sub of the sub-subtitle are written on the left side.
5. The citation is written by the American Psychological Association 6th Edition. Below are samples of citation: (Wong, Sharifuddin, Teng, Li, & Song, 2020); (Triyono, Kamardiani, & Prasetio, 2021); (Debertin, 2004); (Statistics Indonesia, 2020).
6. The figure or table is made as close as possible to the explanation and put the number sequentially based on the site in the explanation. The source of data is better to be included. 
   Note: figure should be clear and fixed (good resolution) 
   A sample of the figure can be seen in Figure 1.

![Figure 1. Amount of Order and Shipping of Leaf Vegetables of PT. SFO in 2017](image)

7. Tables consist of title and content. The line of the table just on the top and the bottom to separate between the title and the content of the table.
A sample of the table can be seen in Table 1.

8. References are arranged alphabetically, beginning from the first author, and followed by the co-author. If there are two or more references with the same author and year of publication, put the sign a, b, c...... etc. after the year of publication. In the reference that site from a journal, scientific magazine, and proceeding should be including the name of author, year, title, place of the seminar, publisher, page, and editor.

The reference of AGRARIS is written following American Psychological Association (APA) 6th Edition. When referring is suggested to use the Mendeley application. (The tutorial of Mendeley can be accessed on https://bit.ly/2vYEQGZ). Below is the sample of APA 6th Edition:

**Article of Journal**

**Article of Proceeding**

**Book**

**Report of Institution or Corporation**

**ADDITIONAL INFORMATION**
