Preface

Bismillahirrahmaanirrahiim. AGRARIS: *Journal of Agribusiness and Rural Development Research* Vol. 9 No. 2 (July-December 2023) has been published. This edition consisted of seven research articles and two literature review articles which came from three focuses and scopes: entrepreneurship and management of agribusiness; rural development; and agricultural economics.

The study about entrepreneurship and management of agribusiness discussed Entrepreneurial Dynamics and Typology in Rural Development (Handono, et al.); Extracting Consumers' Perceptions for Indonesian Spice Drinks Using Social Media Data Mining and Kansei Engineering (Alfiani, et al.); Unleashing the Power of Digital Farming: Local Young Farmers' Perspectives on Sustainable Value Creation (Irawan, et al.); Understanding Studies on Consumers' Food Choices Using Food Choice Questionnaire: A Scoping Review and Bibliometric Analysis (ScoRBA) (Sudewo, et al.); and Tracing Farmers' Entrepreneurship and Communication Skills Using a Bibliometric Approach (Widiyanti, et al.). The rural development examined about Does Household Financial Management of Independent Oil Palm Smallholders Promote Rural Development? (Nurliza, et al.) and Succession Process for Sustainability of Family Dairy Farming (Firman, et al.). In agricultural economics consisted of two topics entitled Risk Analysis on the Cassava Value Chain in Central Lampung Regency (Suryani, et al.) and Do Food Price Subsidies Increase Nutritional Intake of Indonesian Households? (Amrullah, et al.). The various studies had been written from two countries that were Indonesia and Japan.

The various research findings are expected to be a basis for stakeholders and policymakers who relate to the broader field of agricultural development and encourage the advancement of novel ideas for future studies. Lastly, we express our appreciation to all individuals who have made valuable contributions to the completion of this journal publishing, involving the authors, expert reviewers, and editors.

Yogyakarta, Indonesia December 2023
Editor in Chief

Dr. Ir. Widodo, M.P.

Manuscript Guidelines

Manuscript Submission Criteria:

1. The manuscript is a result of agribusiness and rural development research. The manuscript should have a novelty/authenticity contribution or uniqueness for academic (science) development.
2. The manuscript contains original research work, free from plagiarism and other unethical attitudes.
3. The author must ensure that the manuscript has not been published in the other periodical journals at the time of manuscript submission.

Manuscript Systematics:

1. Title. The title should be brief, describe the uniqueness of the research, not exceed 20 words, and should begin with a capitalized letter for each word.
2. Author's name and affiliation. The author's name should be included by affiliation (write completely) and email address, without the academic title.
3. Abstract. The abstract is written in English, one paragraph with single spacing (maximum 250 words) without references or formulas. Keywords consist of 3-5 words or phrases (alphabetically). The abstract contains a brief description of the research background (maximum two sentences), aims, methods, main results, and conclusion.
4. Introduction. The introduction is written without numbers and/or pointers. This section consists of (i) nature and scope of the problem in a broader (national, regional, international) context, (ii) review of relevant literature, (iii) significance/novelty/contribution of this research on knowledge, (iv) aims of this research. If there is a hypothesis, declare it explicitly and not in an interrogative sentence. It should be written efficiently and supported by references. Extensive discussion of relevant literature should be included in the discussion, not in the introduction.
5. Research Method. This section should explain how the research was conducted. It should be written clearly and completely containing a clear description of (i) population and sampling, (ii) data measuring and collecting, (iii) variable and data analysis. This research method should be sufficiently detailed. For qualitative research, please adjust this method to the scientific writing habits while considering the repeatability of the research. It was unnecessary to write analysis methods commonly (e.g., F-test formula, t-test) but just referred to your source. References of original methods/procedures must be stated, and all modifications of procedures (if any) should be explained. Symbol description of the model was suggested to be written on narration.
6. Result and Discussion. The beginning of the results and discussion presents the data and found facts, calculated, and discovered. Data should be presented in Tables or Figures when feasible. The table should be clear and stand-alone, giving complete information without text. The title of Table and Figure should briefly and clearly describe the described facts. Symbols written in Table and Figure should be given complete information and allow the reader to interpret the results. Each Figure and Table must be referred to in the narration. In the rest of the section, the author must discuss the research findings.
7. Conclusion. This section summarizes the principal findings and is written briefly. Conclusion related to the introduction and aims or hypothesis but did not repeat the discussion. Conclusion written critically, logically, and honestly based on the existing fact, and full of cautions if there was a generalization. A recommendation showed the significance of the results/findings or practical application. This section, written in paragraph form, does not use numbering or bullets.

8. Acknowledgments (if necessary). This section provided the authors with gratitude to the research funder, facility, or suggestion and for the statement if the article is part of the thesis/dissertation.
9. Author contributions: for the article with several authors, please write each author's contribution in a brief paragraph. The authorship must be limited to those who have contributed, besides reading and agreeing on the final manuscript.
10. Conflict of interest: the author should declare the conflict of interest or state "the authors declare no conflict of interest." The author must identify and state the circumstances that may influence the interpretation of the research results.
11. References. The reference contains the list of journals, books, or other publications referred to in this manuscript. Each reference cited in the text must be listed in references, and vice versa. References of the manuscript must be traceable, no less than 40 pieces (Min. 30 titles from reputable international journal), should be a primary source (80%), and not exceed 10 years (80%).

Manuscript Format:

1. The manuscript is written in quarto paper size, one column, and 1.5 spacing format. The new paragraph begins with six characters from the left side and uses Time New Roman font 12.
2. The manuscript is written in English.
3. The number of pages between 15-20, the margin on the left and upper sides is 3 cm, the right and bottom sides are 2.5 cm.
4. The title is written uppercase (except preposition) using font size 14 with center alignment. The subtitle is written uppercase and uses font size 12 if there is a sub-subtitle, written capital each word except conjunction. Write capital for each word and italic model if there is a sub of sub-subtitle. Subtitle, sub-subtitle, and sub of the sub-subtitle are written on the left side.
5. The citation is written by the American Psychological Association 6th Edition. Below are samples of citation: (Wong, Sharifuddin, Teng, Li, & Song, 2020); (Triyono, Kamardiani, & Prasetyo, 2021); (Debertin, 2004); (Statistics Indonesia, 2020).
6. The figure or table is made as close as possible to the explanation and put the number sequentially based on the site in the explanation. The source of data is better to be included.

Note: figure should be clear and fixed (good resolution)

A sample of the figure can be seen in Figure 1.

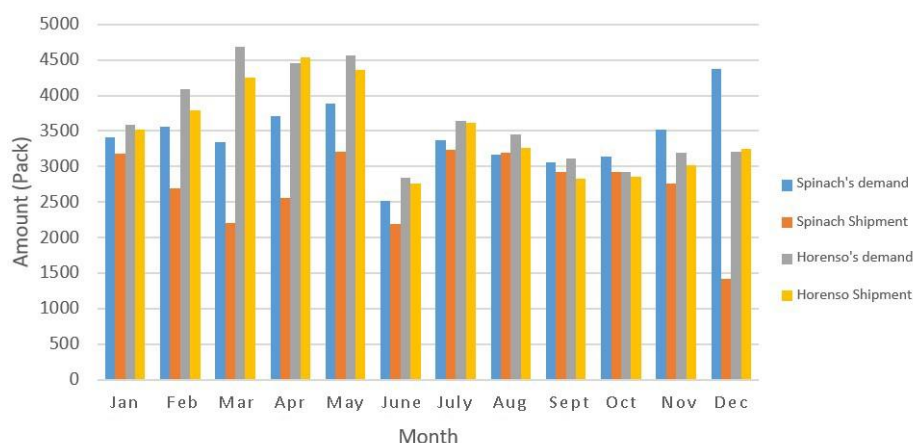

Figure 1. Amount of Order and Shipping of Leaf Vegetables of PT. SFO in 2017

7. Tables consist of title and content. The line of the table just on the top and the bottom to separate between the title and the content of the table.

A sample of the table can be seen in Table 1.

Table 1. Food Waste Generated in Malaysia, 2011

Sources	Food waste	
	Ton/day	Ton/year
Household	8,745	3,192,404
Wet and night market	5,592	2,040,929
Food court/restaurant	5,319	1,941,608
Hotels	1,568	572,284
Food and beverage industries	854	311,564
Shopping malls	298	108,678
Hypermarket	291	106,288
Institutions	55	26,962
Total	22,723	8,308,973

Source: Ministry of Housing and Local Government (MHLG), 2011

8. References are arranged alphabetically, beginning from the first author, and followed by the co-author. If there are two or more references with the same author and year of publication, put the sign a, b, c..... etc. after the year of publication. In the reference that site from a journal, scientific magazine, and proceeding should be including the name of author, year, title, place of the seminar, publisher, page, and editor.

The reference of AGRARIS is written following American Psychological Association (APA) 6th Edition. When referring is suggested to use the Mendeley application. (The tutorial of Mendeley can be accessed on <http://bit.ly/2vYEQGZ>). Below is the sample of APA 6th Edition:
